29	Media analysis	**Media Inspector**
30–31	Reference	**System requirements & troubleshooting**

INTRODUCTION

How we built Quantaflex - and why

The frustration

Modern media work had become unnecessarily fragmented. People needed five or six apps to communicate, prepare media, present content and share the result.

Each platform brought its own login, interface, update cycle, subscription and compatibility rules. The work was often straightforward; the technical friction was not.

The pain points we kept seeing

- Unreliable headphone, microphone, camera and device connections.
- Dropped calls when bandwidth or network conditions changed.
- Outdated software and compatibility problems.
- Disconnected tools and expensive subscription stacks.

A modular approach

We built Quantaflex as a modular media platform: practical tools that work well on their own and make more sense together.

You choose the modules you need and keep control of your tools, without organising your day around disconnected platforms.

Our aim is simple: less friction, fewer surprises, and more time creating, communicating and delivering.

Before you install

Mac: Requires Apple Silicon (M1 or later), macOS 11 Big Sur or newer. Not compatible with Intel-based Macs.

Windows: Windows 10 or 11, 64-bit.

WELCOME

One studio. Six modular workflows.

Home cinema, social video, face-to-face calls, online teaching, encoding and media analysis, together in one premium desktop studio for Mac and Windows.

COLOUR LANGUAGE

ORANGE	Selector
GREEN	Live / Connected / Import
RED	Close / Clear / Stop Presenting

KINEPLEX

Home theatre with a personal film library that remembers where you stopped.

FLEXCAM

Social video edit & posting suite: cut, title, brand and post.

CAM2CAM

Direct HD video calls with studio-quality background effects.

PRO ONLINE LEARNING

Present PowerPoint and PDFs to your learner, live.

ADVANCED ENCODER

Encode, compress, convert and record in professional formats.

MEDIA INSPECTOR

A clear technical report on any video or audio file.

Install & activate

MAC Quantaflex for Mac is signed with an Apple Developer ID and notarised by Apple.

WINDOWS Quantaflex for Windows is signed by Qabalah Limited.

Download Quantaflex only from shop.quantaflexmedia.com.

Mac

1. Open the **.dmg** and drag Quantaflex into **Applications**.
2. Open Quantaflex and allow the **camera** and **microphone**.
3. To present PowerPoint, allow **Screen & System Audio Recording** in System Settings › Privacy & Security, then reopen Quantaflex.

Windows

1. Run **Quantaflex x64-setup.exe**, signed by Qabalah Limited.
2. If Windows says “Windows protected your PC”, choose **More info** › **Run anyway**.
3. Open Quantaflex and allow the camera and microphone.

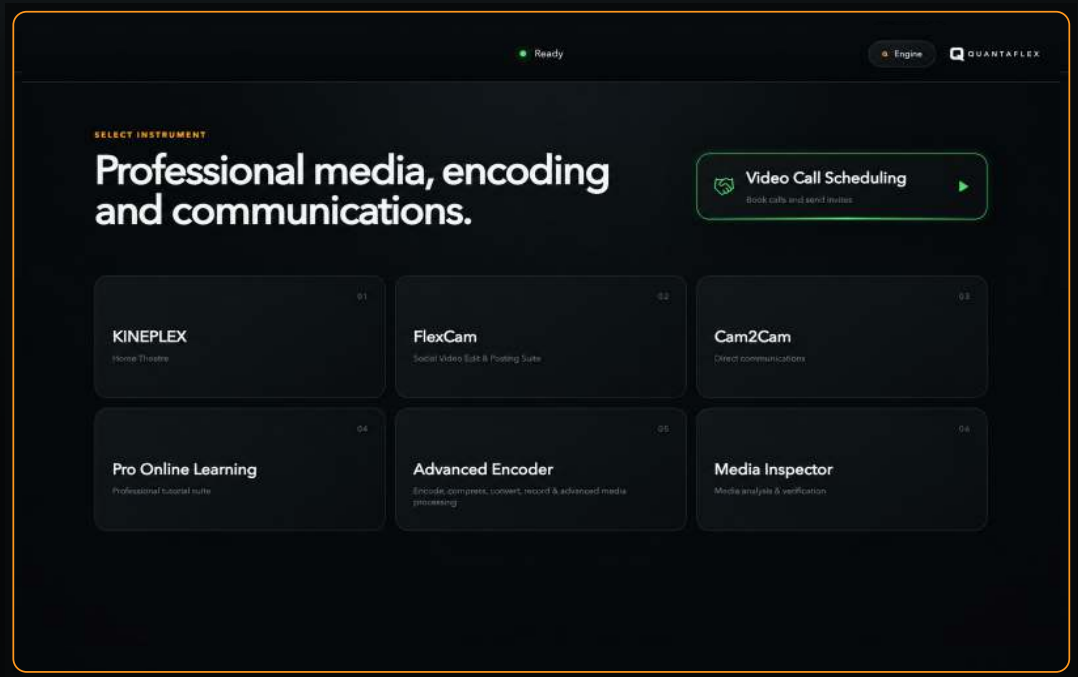

Your licence

1. Create your profile with the **email you bought with**.
2. Choose **Activate**: enter your **order number** (e.g. #1042, in your order email) and the same email. Activating straight after checkout? Use Shopify's **confirmation code**, e.g. **Confirmation #J65VNAFPZ**.
3. Your permanent licence includes all 6 feature workflows. Use your order details above to activate Quantaflex.

THE STUDIO

Home screen

- Choose a module card to open it.
- **< CORE** (top left) or **Esc** returns here.
- One feature runs at a time: a film pauses when you leave Kineplex, and the camera turns off when you leave a call workspace with nobody connected.

HOME THEATRE

Kineplex

- **Open movie** (green) opens any film.
- Move the mouse over the picture for play, ±10 seconds, the progress bar and **fullscreen**.
- The red square stops the film and clears it.
- Volume, brightness, contrast, colour and **CineMode** are on the bar below; speed and display ratio in the left panel.

Display ratio
Fit the picture to your screen.

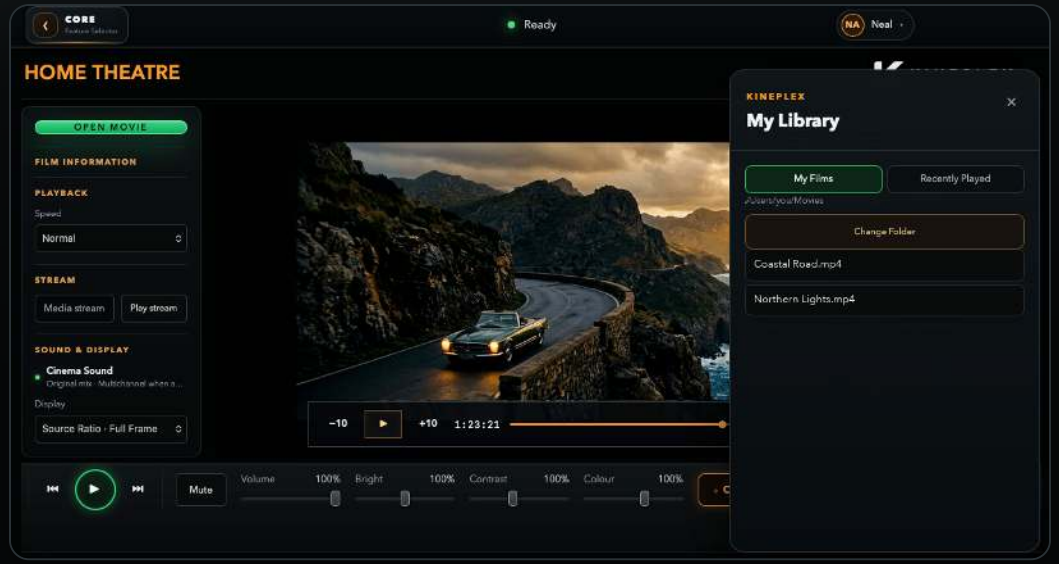

Contrast
Adjust light and dark tones.

CineMode
Apply a cinema picture preset.

HOME THEATRE

My Library

- Press the green **clapperboard** (bottom right).
- **My Films**: choose your films folder once with **Choose Folder**, then pick a film.
- **Recently Played**: your last ten films. Choose one and it carries on where you stopped.

VIDEO CALLS

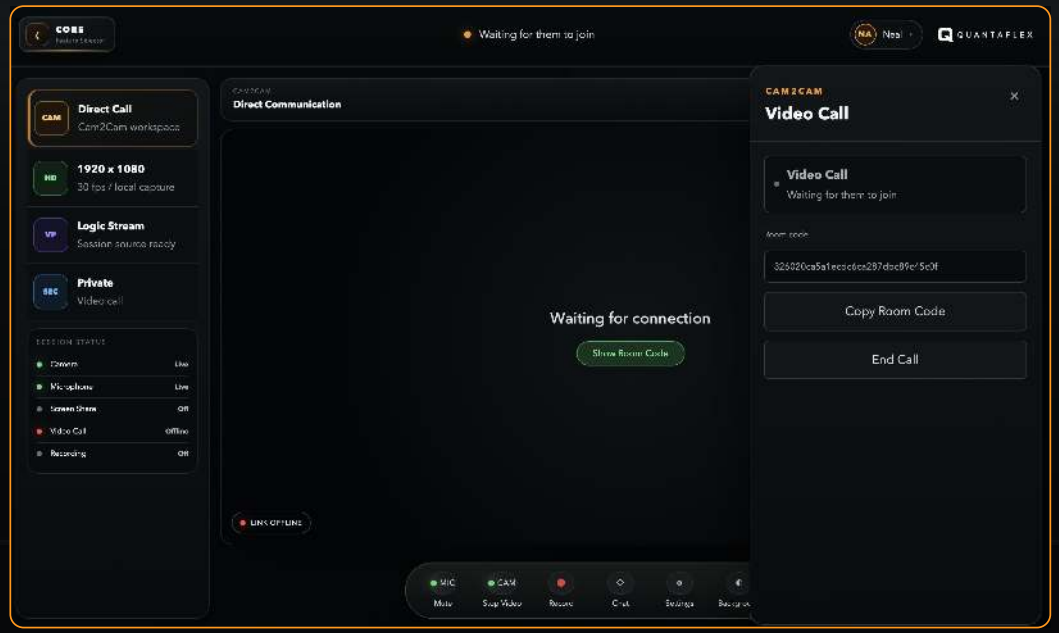

Starting a new call / sending your room code

The same start-up applies to
Pro Online Learning.

1. Press Start, then Start Call.
   The side menu shows your room code.

2. Choose Copy Room Code.
   Send it to the person you are calling,
   for example through a WhatsApp group.

3. They press Start, paste the code and choose Join Call. Use Show Room Code to open it again while you wait.

VIDEO CALLS

Cam2Cam

Your call controls

Use Mute and Stop Video to control your microphone and camera.

Adjust your view

Choose Background for blur or a picture. Open Settings to check your devices.

Finish the call

Choose End Call when you are finished.

VIDEO CALLS

Background

Press **Background** and choose:

- **Blur**: softens the room behind you.
- **Choose Background**: your own picture.
- **None**: turns it off.

Your choice applies in Cam2Cam and Pro Online Learning.

BLUR

CHOOSE BACKGROUND

ONLINE LEARNING

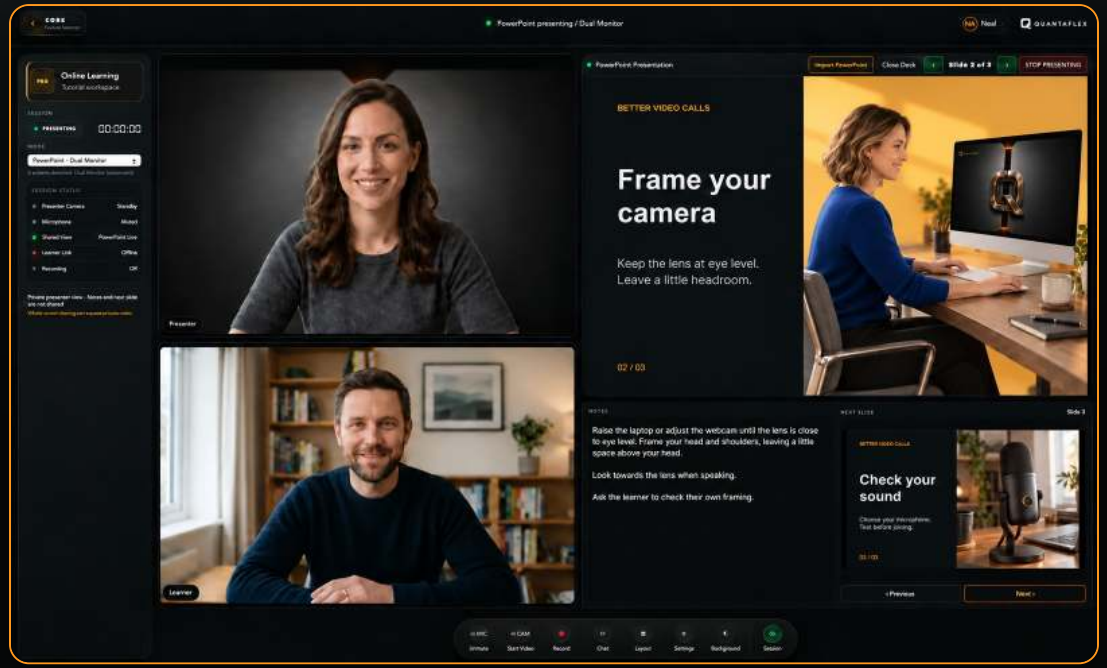

Presenting PowerPoint

- **Import PowerPoint**, then **PRESENT**. Quantaflex picks **Dual Monitor** or **Single Laptop** to match your screens.
- Your **notes** and **next slide** stay private: your learner sees only the slide.
- **STOP PRESENTING** ends the slideshow; **Close Deck** clears it.

Choose your view

Layout changes the arrangement. Choose **Share Focus** to prioritise the shared screen.

The shared-information **fullscreen** control enlarges the presented slide.

ONLINE LEARNING

Presenting PDFs

- **Open Document**, then the green START PRESENTING. It turns red, STOP PRESENTING, while live. Only the page is shared.
- Open another document while presenting and your learner sees it at once. **Close Document** clears it.
- Your learner can present back the same way; whoever presented last is shown.

PRESENTER

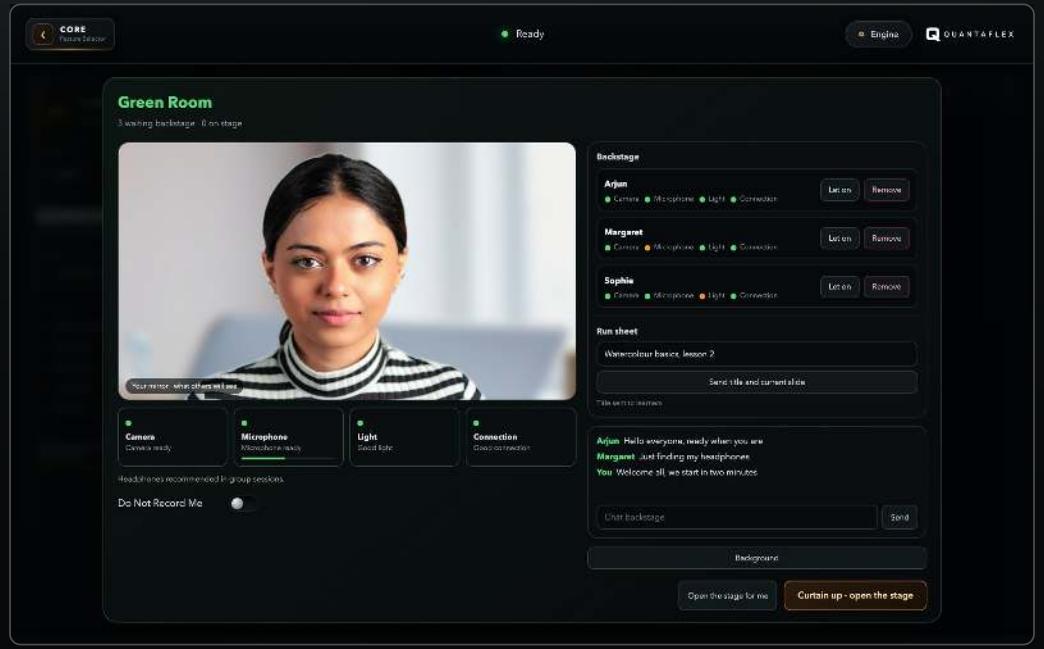

LEARNER

ONLINE LEARNING

The Green Room

- People who join wait backstage. They see their own camera and checks.
- Check the lights beside each name. **Green**: camera, sound and light are ready.
- Choose **Let on** for one person, or **Curtain up** to bring everyone on stage.

THE GREEN ROOM

ONLINE LEARNING

Teaching a group

- Up to 7 people: you and 6 learners.
- Press **Start**, then **Start Call**. Learners press **Start**, paste your room code and choose **Join Call**.
- Each learner appears in the Learners panel with their first name. **CAM LAYOUT** switches between **Strip**, **All** and **None**.

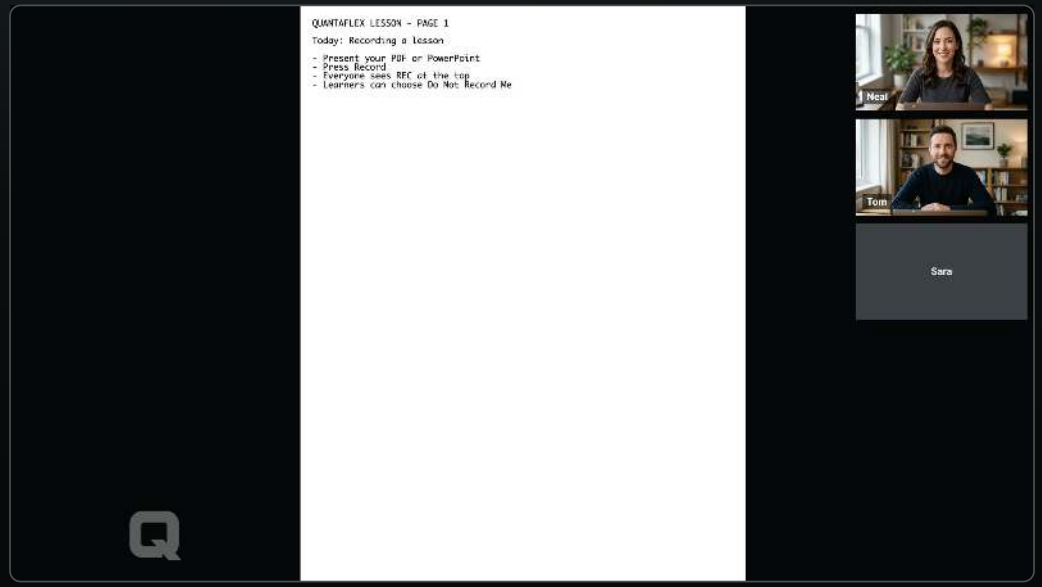

A GROUP LESSON

PERMISSIONS

Recording a lesson

- The presenter presses **Record**. Everyone sees **REC** at the top while it runs.
- The recording shows what you present, your PowerPoint, PDF or shared screen, with each person's camera and first name.
- Every voice and the presentation sound are recorded. Press **Record** again to stop; the lesson is saved as an MP4 video.

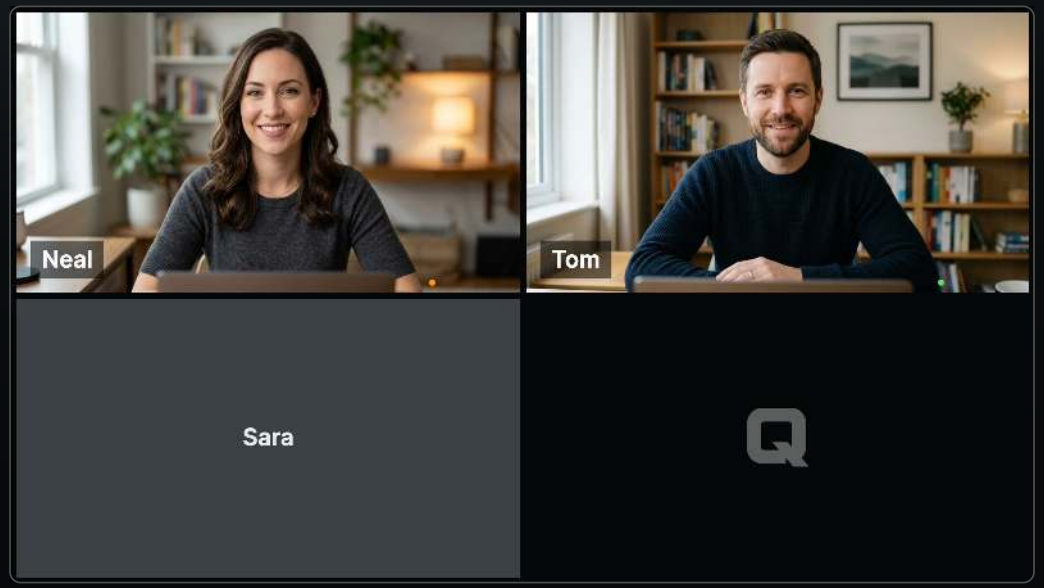

THE RECORDING

PERMISSIONS

Do Not Record Me

- In the green room, before the lesson, a learner can switch on **Do Not Record Me**.
- In the recording they appear as a grey tile with their name, and their voice is left out.
- The live lesson looks the same for everyone.

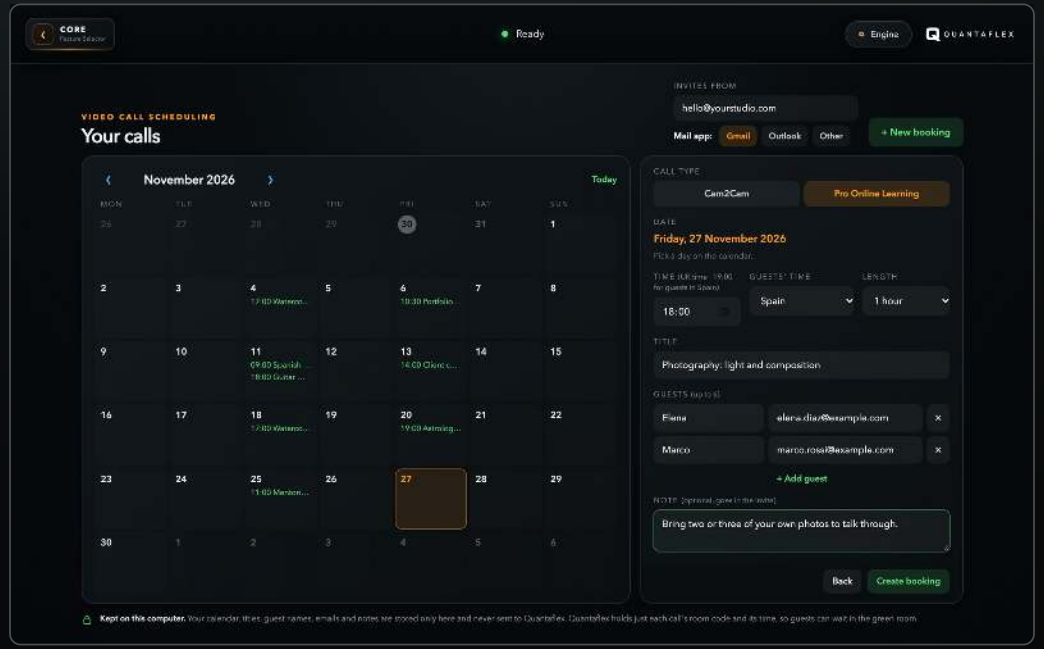

THE RECORDING · CAMERAS ONLY

SCHEDULING

Book a call

- On the home screen, press **Video Call Scheduling**.
- Pick a day, then **+ New booking**. Set the call type, start, length and the guests' time zone, then add each guest.
- Your calendar and guest details stay on this computer. Quantaflex holds only the room code.

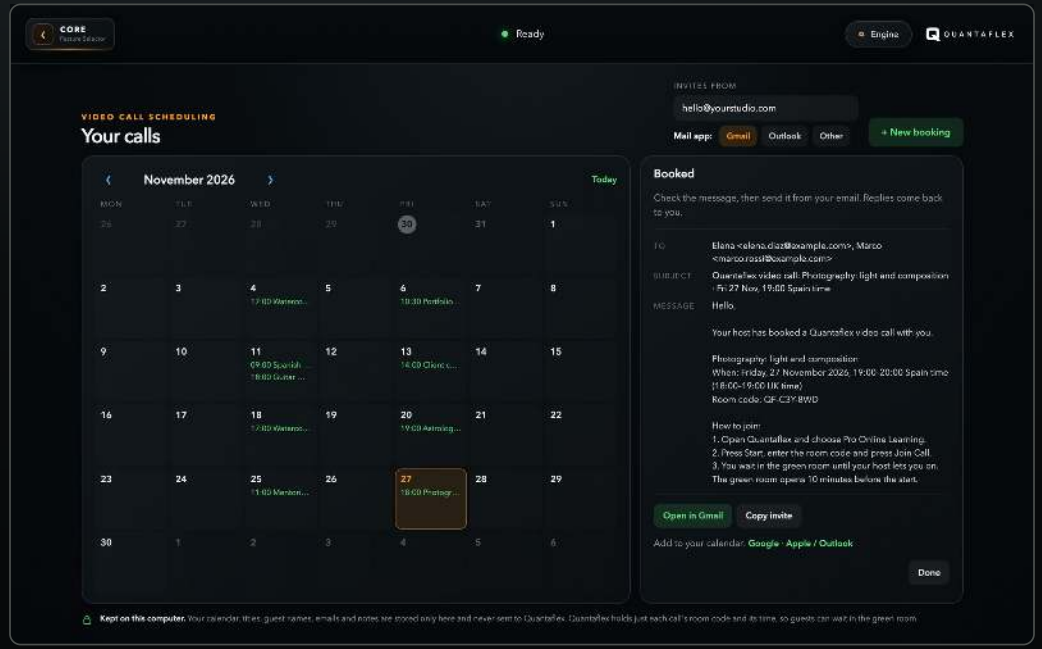

NEW BOOKING

SCHEDULING

Send the invite

- Enter your email under **Invites from** and choose **Gmail**, **Outlook** or **Other**.
- A new message opens, ready to send from your account. Guests read their own time first, with yours in brackets.
- The green room opens 10 minutes before the start. Press **Start Call** on the booking and let your guests on.

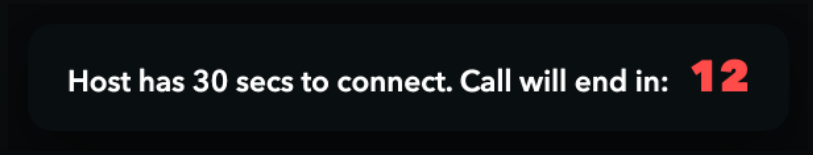

THE INVITE

SCHEDULING

Staying on the call

- On stage, keep your camera on and uncovered. A guest without one for three minutes leaves.
- Muting is fine at any time.
- A lost connection has three minutes to return.
- If the host goes offline, a countdown shows the last 30 seconds.

HOST COUNTDOWN

SOCIAL MEDIA POSTING SUITE

FlexCam
Build your edit

Import

Name your social media project.

Arrange

Place clips on the timeline in the order and size you want.

Trim & split

Select a clip, then move the playhead inside it. Use Trim Start, Trim End or Split.

VIDEO EDITING

Format & finish

Frame each version

Choose a format in **Social Previews**. Check the crop before exporting.

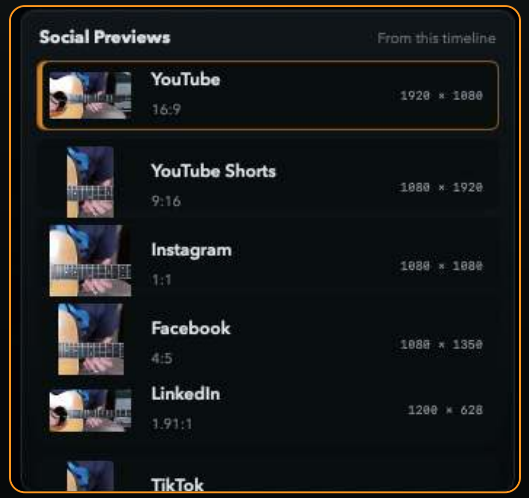

Add your finish

Use **Titles & Text**, **Brand Assets**, **Music & Audio** and **Captions** as needed.

Check the result

Keep titles inside the guides. Use **Render Preview** to review the finished edit.

> **PHOTO POST** creates still-image posts.

One edit, several formats

16:9 · YouTube

9:16 · Shorts & TikTok

1:1 · Instagram

4:5 · Facebook

1.91:1 · LinkedIn

VIDEO EDITING

Export & publish

Select your destinations

Turn on the formats you want in **Export & Post**.

Confirm your post

For a connected account, enter the title and visibility. Confirm the destination, then choose **Render & upload** or the LinkedIn posting action.

Review the result

Check the completed upload. Other selected formats are saved as files.

> **First connection?** Follow the YouTube or LinkedIn setup pages next.

YouTube & Shorts

Uploads default to **Private**. Review visibility in YouTube Studio.

LinkedIn

Posts default to **Connections only**. Choose **Anyone** for a public post.

Saved files

Documents › Quantaflex Social Video › your project name

Connect YouTube

In your browser

1. **Create a Google Cloud project.**
   Open console.cloud.google.com and select or create a project.

2. **Enable the YouTube API.**
   In **APIs & Services › Library**, find **YouTube Data API v3** and choose **Enable**.

3. **Set up Google Auth Platform.**
   Complete **Branding** and **Audience**. For an External app in Testing, add your Google account as a test user.

Finish the connection

4. **Create the Desktop app client.**
   In **Clients**, choose **Create client › Desktop app**. Download the JSON credentials file.

5. **Import the file in FlexCam.**
   Under YouTube account, choose **Set up › Import downloaded file…**. Alternatively, enter the Client ID and secret, then **Save & connect**.

6. **Sign in and allow uploads.**
   Use the Google account that owns your channel. Return to FlexCam and check **Connected** and the channel name.

Google Cloud: console.cloud.google.com Google OAuth client guide

Connect LinkedIn

In your browser

1. **Open the Developer Portal.**
   Go to linkedin.com/developers/apps. Select your app or choose **Create app** and complete its required details.

2. **Add the two products.**
   Under **Products**, request **Sign In with LinkedIn using OpenID Connect** and **Share on LinkedIn**. Wait for access to be available.

3. **Copy the redirect URL.**
   In FlexCam, choose **Set up** under LinkedIn account. Use **Copy** beside the displayed redirect URL.

Finish the connection

4. **Register that URL.**
   In your LinkedIn app's **Auth** tab, add the exact copied URL to the authorised redirect URLs and save.

5. **Enter your client details.**
   Copy the **Client ID** and **Primary Client Secret** from **Auth** into FlexCam. Choose **Save & connect**.

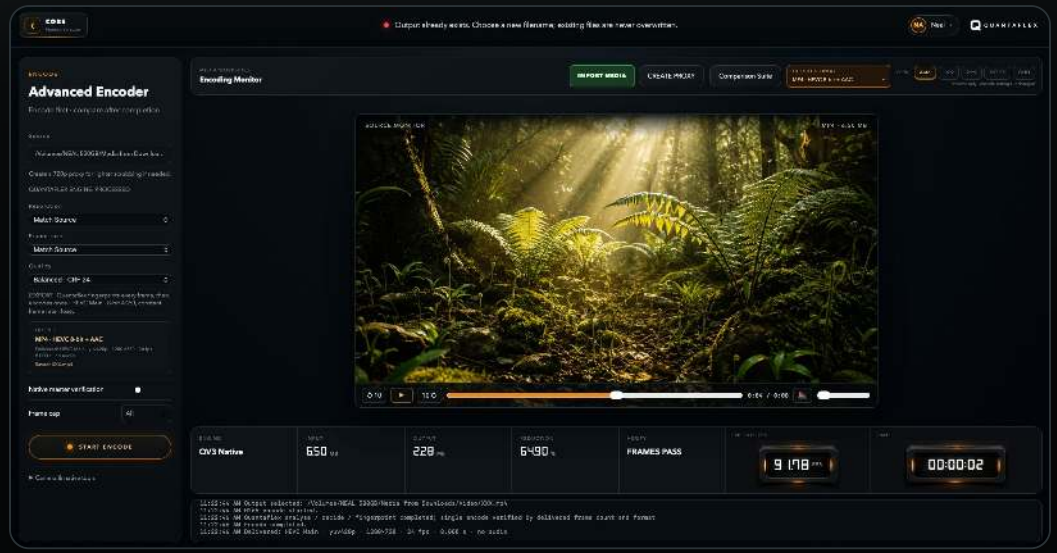

6. **Sign in and allow posting.**
   Approve the LinkedIn request in your browser. Return to FlexCam and check **Connected** and the member name.

LinkedIn: linkedin.com/developers/apps LinkedIn authorisation guide

MEDIA ENCODING

Advanced Encoder

- Choose a source and a professional delivery format, then encode.
- Watch progress live, then compare the result with the original.
- Your original file is never changed.

ADVANCED ENCODER

Media Comparison

Open Comparison Suite

After encoding, choose **Comparison Suite**. Your selected original and completed output load into the two monitors.

Choose your view

Use **Side by side**, **Split comparison**, **Source focus** or **Output focus**.

Link playback

Keep **Linked playback** on to play, pause and seek through both files together. Compare detail, motion and colour.

Review & return

Check the file sizes and processing status. Choose **Encoder Workspace** to return.

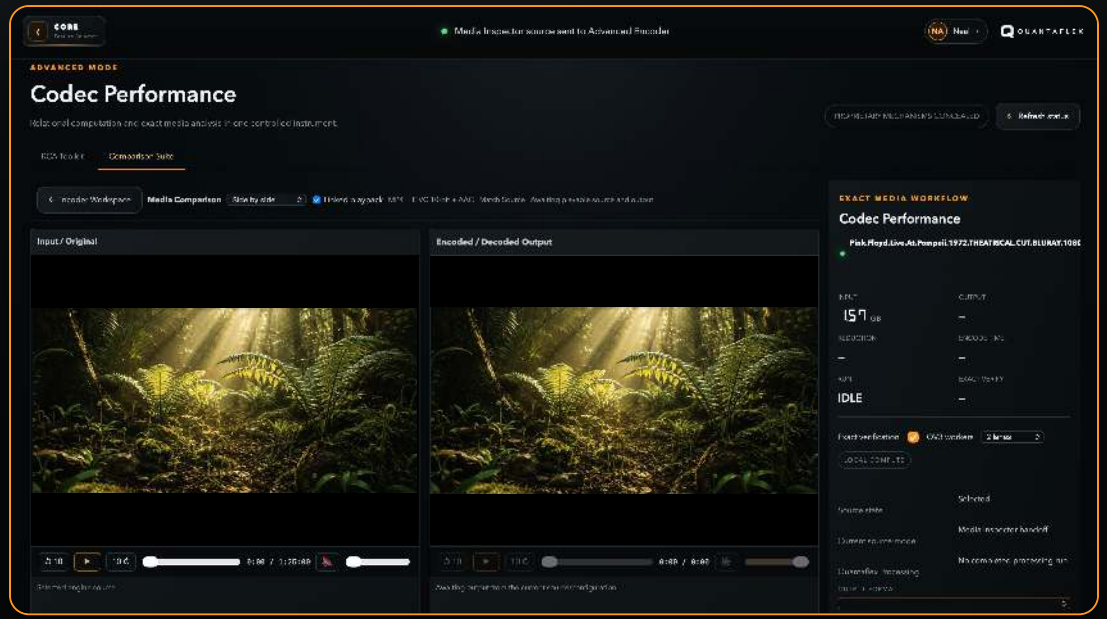

Illustration: matched frames in the original and encoded output monitors.

MEDIA ANALYSIS

Media Inspector

A full technical report - so you know what is inside the file before you encode or share it.

Open Media

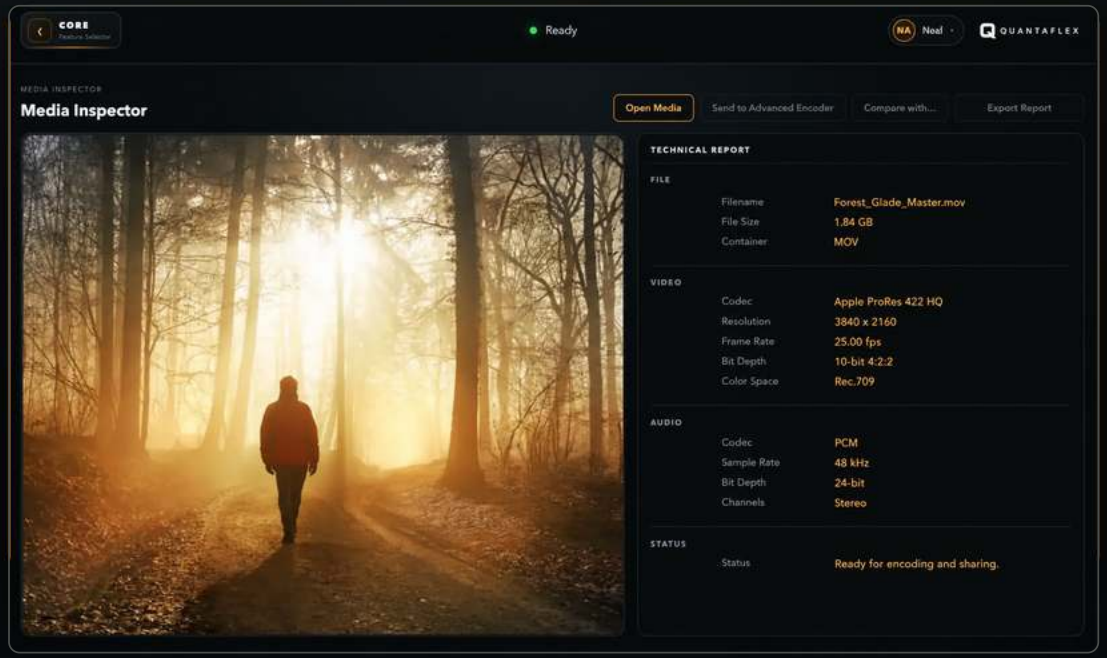

Read its codec, resolution, frame rate, bitrate and audio details. Check frame integrity.

What to check

- **Codec:** the .mp4 extension alone does not tell you how a file is encoded.
- **Frame rate:** compare it before combining clips.
- **Audio & bitrate:** check the channels and source quality before delivery.

Choose your next step

Send to Advanced Encoder, **Compare with…** or **Export Technical Report**.

System requirements

Desktop

Mac	Apple Silicon (M1 or later), macOS 11 Big Sur or newer. Intel-based Macs are not supported.
Windows	Windows 10 or 11, 64-bit
Disk space	About 500 MB, plus your media

Connected workflows

Camera & mic	Built-in or USB webcam and microphone
Internet	For activation, calls and posting

Troubleshooting

Camera or microphone unavailable

Allow Quantaflex access in privacy settings, then reopen the app.

Slides not visible on Mac

Allow **Screen & System Audio Recording** for Quantaflex, then reopen it.

Licence not applied

Use the purchase email and order number. A checkout confirmation code can also be used.

YouTube not connected

Check that the OAuth client is a **Desktop app** client. Re-enter its details or import the downloaded JSON, then try again.

YouTube upload stays private

Check visibility in YouTube Studio. Google can restrict uploads from unaudited API projects to Private.

Sharing another application

Choose **Shared Screen** and the required window. Avoid sharing the Quantaflex window.
